SATIN MOTH INVADES OREGON;
QUARANTINE HEARING, SEPT. 14

- - -

A public hearing to consider the advisability of either: (1) revoking the domestic satin moth quarantine, or (2) revising the regulations to designate the State of Oregon as infested with that insect, will be held before the Bureau of Entomology and Plant Quarantine in Room 2050, Bureau of Agricultural Economics Conference Room, Extensible Building, Independence Ave. and Fourteenth St., S. W., Washington, D. C., at 10 a.m., September 14, 1936.

This insect, although not widely prevalent in the United States, has been known to exist for some time in some areas in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, and Washington. Recently it was discovered in Oregon. It appears necessary, therefore, either to revoke the quarantine, or to include Oregon in the quarantine, now covering the other infested States. The quarantine prohibits the movement from infested areas of poplar and willow trees or parts of these trees capable of propagation.

The hearing is called by the Secretary of Agriculture in accordance with the plant quarantine act so that any person interested in the proposed revocation or extension of the quarantine may appear and be heard either in person or by attorney.
